Who's OVHcloud ?

Who's OVHcloud ?

OVHcloud, the leading European cloud provider, offers IT services to businesses and administrations. Cloud services can take many forms: infrastructures corresponding to servers for storage, computing and networking

("IaaS"), IT development tools ("PaaS") and software solutions ("SaaS").

Founded in 1999
by Octave Klaba

2700
employees

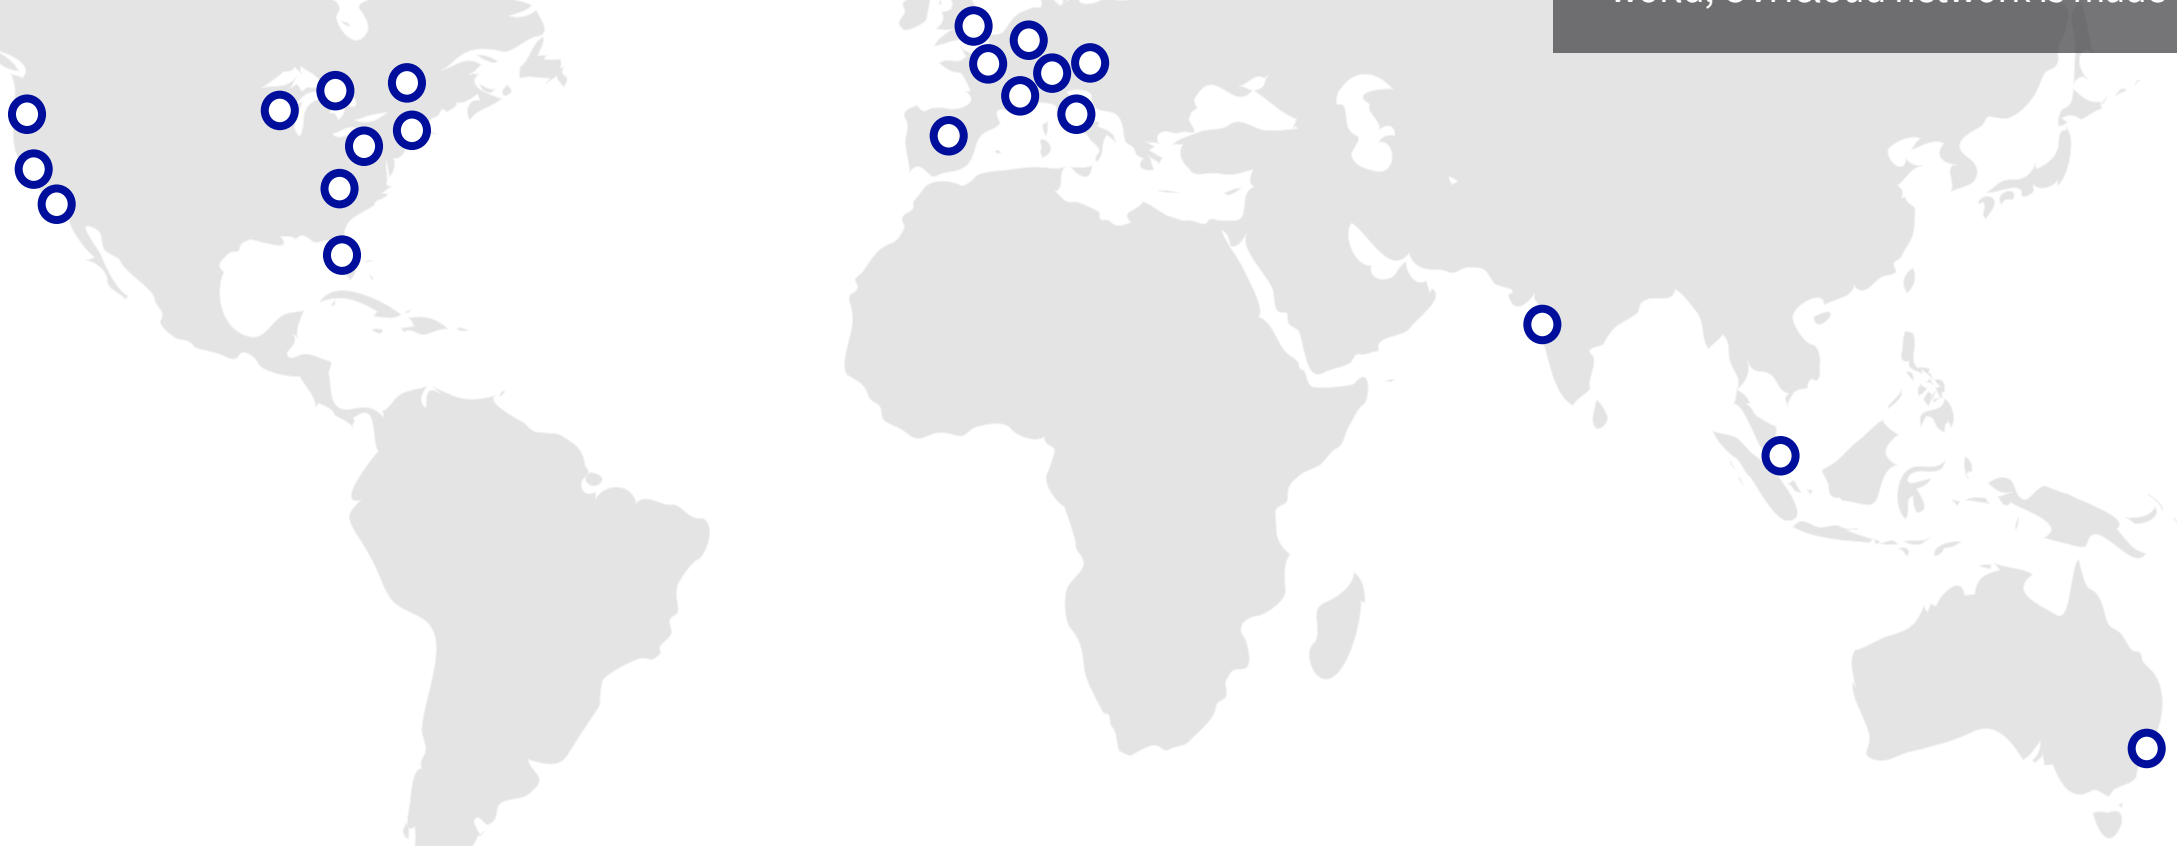

1.6 million
customers

400 000 servers
in 33 datacenters

Our PoPs

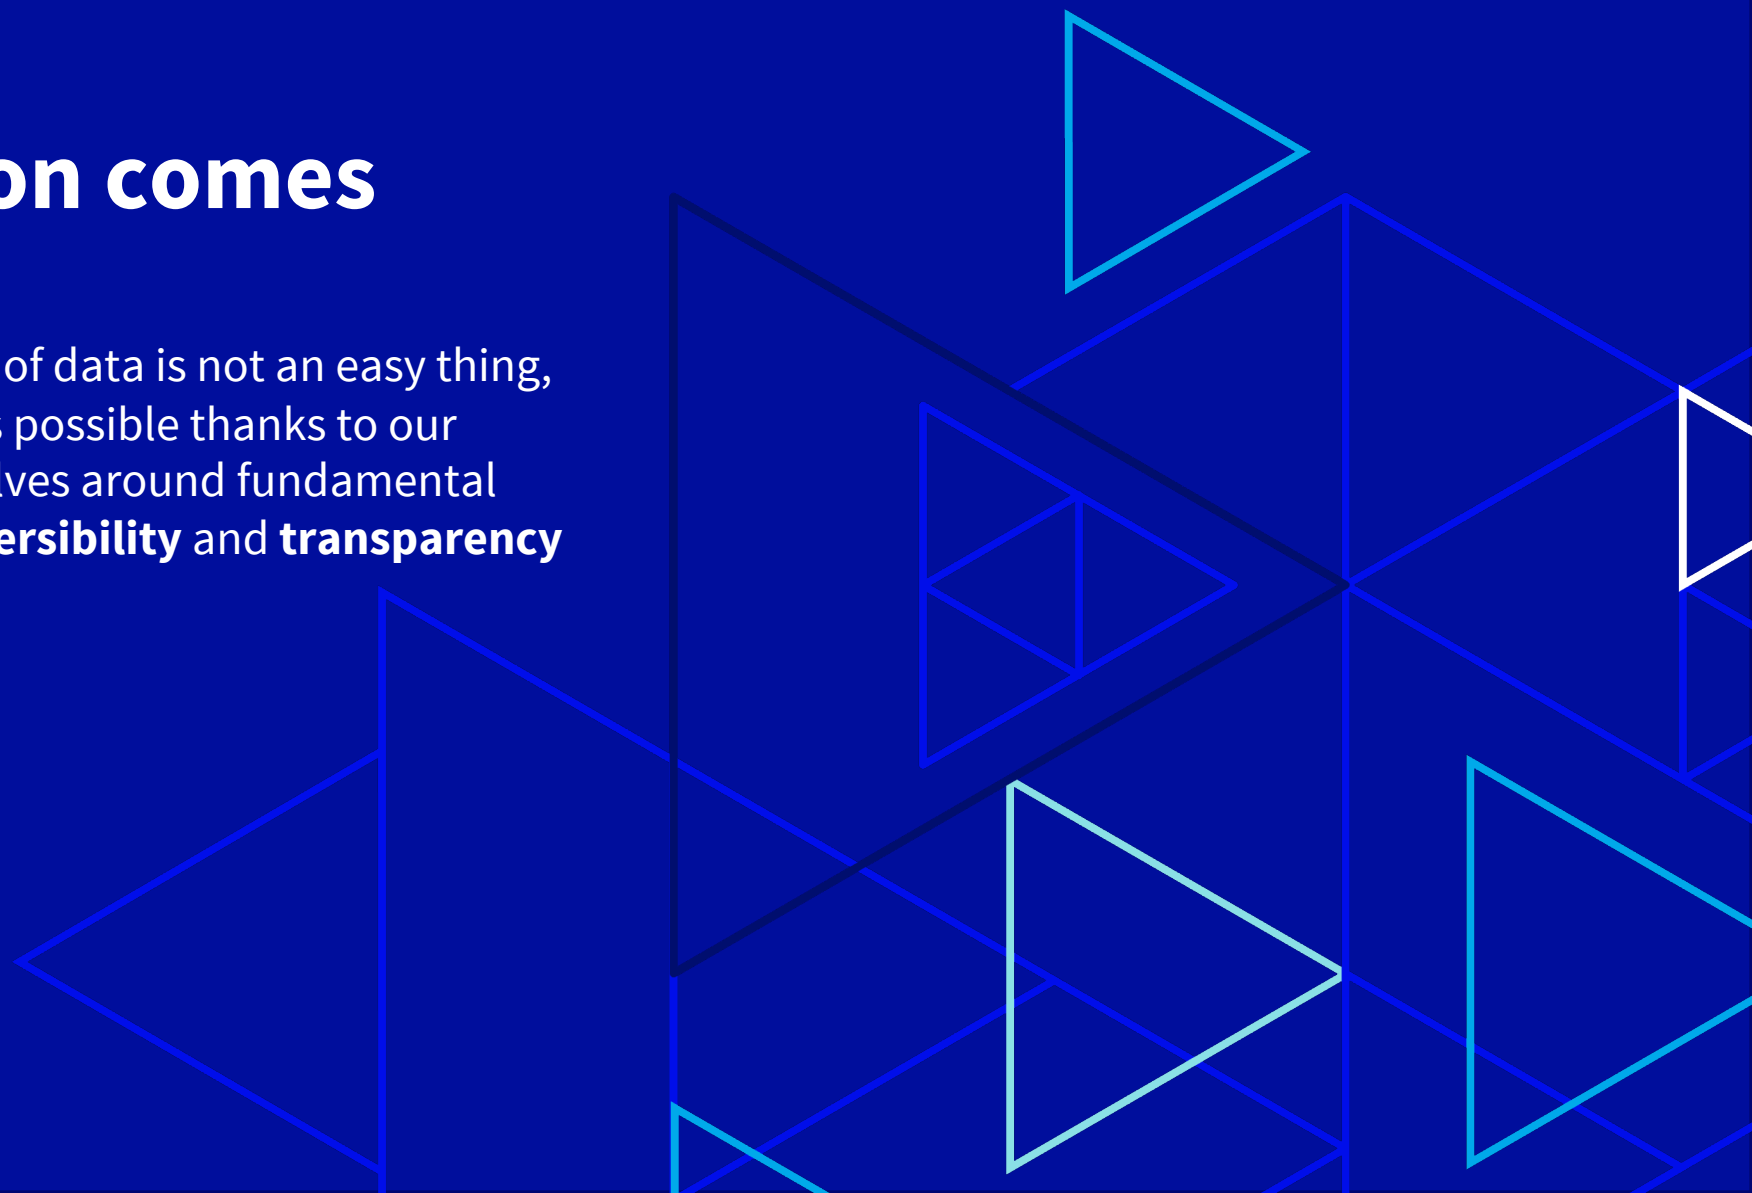

To connect our customers to the rest of the world, OVHcloud network is made of 45 PoPs

With Innovation comes Freedom

Open a new Path in the world of data is not an easy thing, but we are convinced that it is possible thanks to our unique ecosystem which resolves around fundamental values such as **openness**, **reversibility** and **transparency**

Michel Paulin, CEO of OVHcloud

Our peering Policy is Open

OVHcloud peering policy

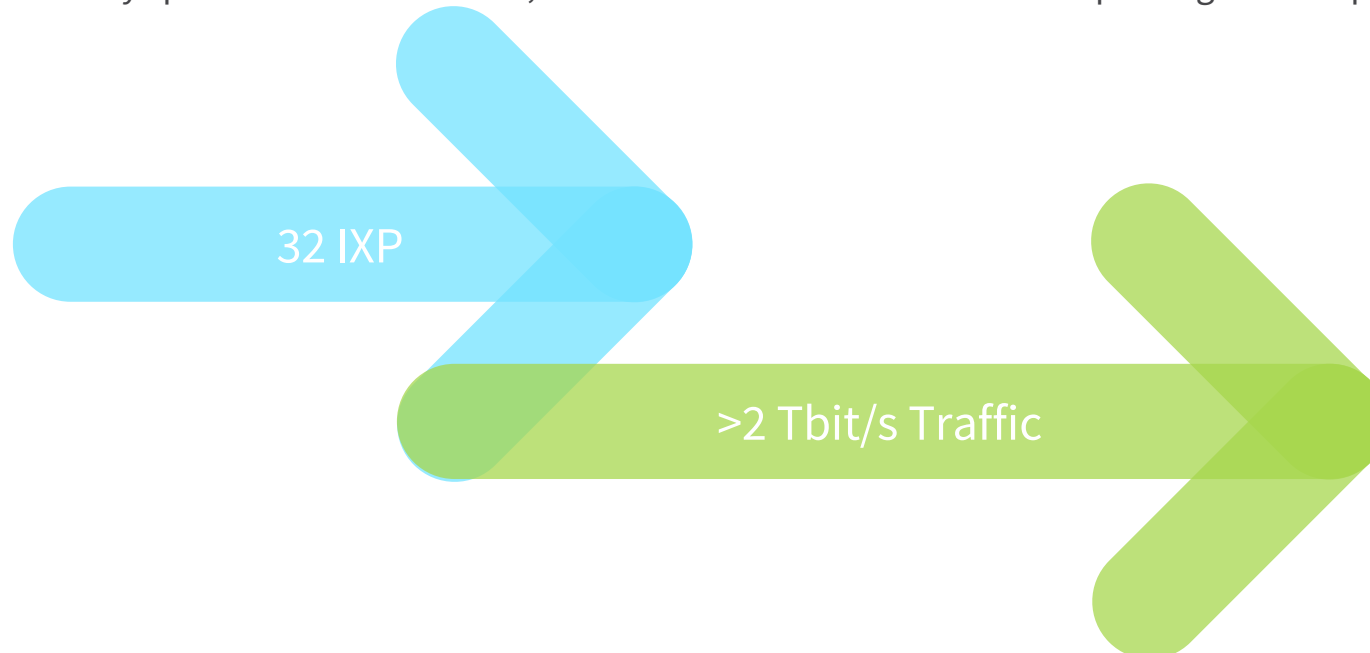

► Peering with AS16276 on Internet Exchanges

For low traffic levels, under 10Gbps peak, we recommend using direct sessions on Internet Exchanges.

BGP sessions should be established in IPv4 and IPv6 if available

Technical information (IPv4/IPv6) about peer should be visible publicly on peeringdb.com

OVHcloud is not always present on route server, but direct sessions can be asked to peering team at peering-16276@ovh.net

OVH @ BNix

- ▶ Member since 2008
- ▶ Nx100G capacity
- ▶ Low latency from our Datacenter in Roubaix : 2.4ms

Peer with US

- ▶ You can find All information about our peering policy, foot print, prefixes on <https://peering.ovh.net>
- ▶ Our peeringDB page is up to date 😊

Thank you
